Computer Furniture Systems

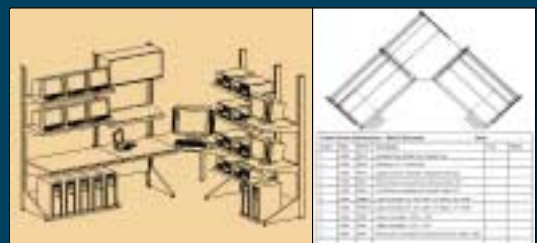

WHY ARLINK IS THE COMPUTER FURNITURE SYSTEM OF CHOICE

- Cost effective, high quality products will never need replacement.
- Rapid installation saves time, money and minimizes downtime.
- Fast & easy reconfiguration using Arlink's unique Definite Positioning System.™
- Multi-functional, modular design can serve applications anywhere in the facility.
- Full adjustability improves efficiency of operators and the task.
- Short deliveries turn your plans into results quickly.
- Extensive Support Network ensures local support.
- Customization services provide solutions for any unique needs you may have.

ARLINK LAYOUT ASSISTANT SOFTWARE

Configure and compare different system configurations by examining plan views, elevations, 3D perspectives, bills of material and their relative costs. Arlink's Layout Assistant Software simplifies and speeds facility layout planning while providing an accurate drawing of the system you plan to order, reducing the chance of making an error. Contact Arlink to take advantage of this service.

ARRLWK

A SOLUTION FOR EVERY APPLICATION

The Arlink family of Computer Furniture Systems provides a cost effective & efficient method of organizing network, test or analytical equipment. A variety of different module sizes may be interconnected in any combination to achieve the perfect layout for your application. Using Arlink's Definite Positioning System, the use of vertical space is maximized ensuring expensive real estate is put to full use while providing personnel with a highly productive work environment. The system's design also accommodates technicians, operators, or system administrators who need personal work space while simultaneously housing all associated equipment.

19" (48cm) RACK MOUNT BRACKETS: Mount hubs, patch panels or routers confidently and safely.

CORNER WORK SHELF: Accommodates monitors & other equipment.

SPLIT BAY STATION: Adds flexibility by providing independently configurable bays.

FLAT PANEL MONITOR ARM: Mounts in the macroslot of any support column and provides easily adjustable support for flat panel monitors.

HORIZONTAL & VERTICAL WIRE MANAGERS: Controls wiring and cables, provides easy access for re-routing.

ARTICULATING ARM KEYBOARD SHELF: Adjusts to any operator's posture and preference; stores below worksurface when not needed.

MOBILE RACK SHELF: Mobile shelf mounted assembly accommodates 19" (48 cm) rack mount equipment.

OPEN STABILIZER SYSTEM: Allows clear access to the rear of equipment positioned under a worksurface or on the floor.

MOBILE SERVER SHELF: Stores tower units or other heavy equipment at floor level, on rollers, for easy access.

ADAPTS TO ALL REQUIREMENTS

The answer to any application, Arlink's Computer Furniture is a system of interchangeable components which easily assemble to create varied layouts to fit any room, and which can be expanded or reconfigured as needs change. Arlink's Open Stabilizer concept enables complete access to the rear of equipment. Vertical and horizontal cable management separates and organizes all cables and cords. Shelving, work-surfaces, and a variety of drawer and storage modules provide added utility. Arlink's design enables easy adjustment to achieve sound ergonomic configurations, reducing strain, fatigue and workplace injuries, while providing a highly productive, working environment.

CONFIGURABLE FLEXIBILITY

The unique columnar design of Arlink's System allows easy organization of IT hardware on a variety of shelving and adjustable worksurfaces. A host of accessories lets you create task specific modules which are easily changed to accommodate new equipment or work methods. Add electrical and data beams, horizontal and vertical cable management, keyboard and mousing support, standard or flat panel display holders and a host of other accessories geared to information technology environments. Our representative will help you configure a system matched to your application and tailor it to meet specific operational needs. Most configurations are available with mobile bases, adding even more versatility to an already robust system.

ARLINK WORKSTATION SYSTEMS

Arlink has been designing and manufacturing state of the art technical furniture solutions since the mid '70's. Our products may be found in thousands of installations worldwide, providing application solutions in manufacturing, education, information technology centers, laboratories, and more.

Arlink is a customer oriented company and believes that high levels of customer service and uncompromising ethics, in conjunction with excellent products, is essential to forming strong partnerships with our customers.

Arlink's support network extends across North America, and beyond. Arlink Europe supports customers across Europe and additional distribution can be found throughout Asia, South America, and the Middle East.

Arlink is ISO9001 certified, and our relentless focus on continuous improvement in all that we do benefits our customers and assures their high quality support today, and well into the future.
